REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Upon further consideration, the prior art does not disclose or suggest a magnesia-based refractory composition containing sulfamic acid and 5.0-8.0 wt% calcium hydroxide. Of the previously applied art, Nagle et al. (US 4,383,045) does not disclose or suggest employing calcium hydroxide, and JP 62-148377 does not suggest employing greater than 5.0 wt% calcium hydroxide.

JP '377 discloses employing five parts by weight calcium hydroxide. See page 8, last sentence. Five parts by weight calcium hydroxide added to 100 parts by weight refractory aggregate, 0.1 parts by weight aluminum sulphate and 0.1 parts by weight sulfamic acid converts to a composition containing 4.8 wt% calcium hydroxide.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Sample whose telephone number is (571)272-1376. The examiner can normally be reached on Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jerry Lorengo can be reached on (572)272-1233. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
